### ***Response to Arguments***

Regarding applicant's arguments regarding the rejections of claims 1-11 under 35 U.S.C. 102(e) as anticipated by Saito et al. (US 6,891,782), these arguments are persuasive and the previous grounds of rejection are withdrawn.

Regarding applicant's arguments regarding the rejections of claims 1-11 under 35 U.S.C. 102(e) as anticipated by Yokoi et al. (hereafter Yokoi)(US 6,487,149), these arguments have been fully considered but not are persuasive.

On Page 3 of applicant's remarks, applicant argues, "Yokoi does not teach or suggest an offset signal generator configured to generate an offset signal as the predetermined voltage V2 is not an offset signal by a reference signal." The Examiner respectfully disagrees. Similar to the output of reference signal generator, 42, depicted in Figure 2 of applicant's drawings, the output of Figure 2, Element 32 of Yokoi is the offset voltage (V2) added to the peak-hold voltage. Voltage, V2, offsets the peak-hold voltage by a predetermined positive amount. Thus, as read in the context of the claims, voltage, V2, is an offset voltage.

### **DETAILED ACTION**

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2627

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by Yokoi et al. (hereafter Yokoi)(US 6,487,149), as applied in the Non-Final Office Action dated 5/2/07.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yoshida et al. (US 6,603,726) discloses a pre-pit detection unit. Yanagawa et al. (US PgPub 2002/0114261) discloses an apparatus for synthesizing signals derived from an optical disc. Ueno (US PgPub 2003/0058764) discloses an

optical disc device which performs land pre-pit detection. Kato et al. (US 6,928,041) discloses a pre-pit detecting apparatus for optical recording medium.
